Product Catalog

Yesterday

Founded in 1929, SaniServ® began as a manufacturer of amusement park equipment in Indianapolis, Indiana. In 1931, the company manufactured the very first frozen custard machine.

In 1951, a continuous type ice cream freezer called a “SaniServ” was introduced, and in 1955 a continuous milk shake dispensing machine became part of the product offering. A year later, an automatic hamburger flame broiler was introduced which formed the basis for the Burger Chef fast food chain headquartered in Indianapolis

During the mid 60’s, SaniServ manufactured 80% of all equipment used in Burger Chef’s restaurants. Hardee’s purchased Burger Chef from General Foods in 1980 and converted all units to the Hardee’s brand. SaniServ continued to grow and prosper with their core products of ice cream and frozen beverage machines.

Today and Tomorrow

SaniServ® was purchased by current management in 1998. New management brought a broad range of knowledge and experience in manufacturing, research and development, sales and marketing, and national accounts.

SaniServ® acquired Southern Equipment Company’s “Seco” division of racks, cabinets, tables and equipment stands in 1999. Manufacturing operations were moved into the SaniServ® facility at that time. The Seco products, reintroduced by SaniServ®, are known for their quality and institutional service reliability. SaniServ acquired a small wares manufacturer of plastic containers and accessories in 2006.

SaniServ® sells to every customer base in the food-service industry including consultant-specified bid and institutional work, government and the military and private business through designated distributors and foodservice equipment representatives.

Chains are an important and growing part of SaniServ’s business. SaniServ® currently has product approvals for many top chains, including: Burger King, Wendy’s, Fazoli’s, Outback, Applebee’s, Don Pablo’s, Lone Star, Red Robin, Krystal’s, Texas Roadhouse, White Castle and many more.

SaniServ offers a unique blend of value, quality, flexibility, expertise and customer service to meet and exceed our customer’s expectations.

DESIGNED FOR LOWER VOLUME APPLICATIONS

Two - 4 oz. Servings per Minute - 7 Qt. Capacity

GREAT FOR CAFES, RESTAURANTS, AND PRODUCT SAMPLING

The **SaniServ** model 407 Soft Serv Freezer is perfect for providing small servings, samplers, and adding a-la-mode to favorite desserts. The 407 is an economical addition to any restaurant with its affordable price and space saving countertop solution. The 407 is always a favorite among operators to supply a limited amount of Soft Serv ice cream and frozen yogurt products to keep customers coming back for more treats!

SPACE SAVING

Small Footprint Design - SaniServ model 407 saves valuable floor space and turns the countertop into a real profit center by serving high profit ice cream and yogurt products.

EASY CLEANING AND OPERATION

Fewer Parts = Simplified Cleaning - SaniServ equipment is designed and built with the fewer parts to be disassembled, cleaned and sanitized than any other machine in the industry.

HIGH RETURN ON INVESTMENT

Increased Profits - SaniServ machines combine efficiency with consistent product quality and fast quiet operation while insuring customer satisfaction with high profit ice cream or yogurt products.

QUALITY DESIGN

Durability - SaniServ machines are built to achieve long and dependable life through simplicity of design. Every machine is shipped standard with a stainless steel exterior, durable steel interior frame construction, heavy-duty components and consistency systems.

DESIGNED FOR MEDIUM VOLUME APPLICATIONS

4 Gal per Hour & 14 Qt Capacity per side

OFFER TWO DIFFERENT FLAVORS IN ONE MACHINE!

MAXIMIZE YOUR PROFITS

Combine efficiency with consistent product quality and fast quiet operation to insure customer satisfaction with one Milk Shake flavor and one Frozen Beverage flavor.

ADD TO YOUR PRODUCT OFFERING

You can offer Milk Shakes and fruit flavor slush, frozen lemonade, Fresh fruit and yogurt based smoothies, frozen cocktails like Margaritas, Pina Coladas and Daiquiri's. This 115 volt unit is easily added to your operation.

FAST SERVICE

Designed for the most demanding high volume operations. Just pull the spigot handle to dispense the ready to consume product, up to two 8-oz. servings per minute, per side.

HIGH VOLUME OF PRODUCT

The model 808 produces up to 4 gallons of frozen beverages per hour, and 4 gallons of milk shake product per hour. Each evaporator and mix pan holds 14 quarts of product. You will have product available even during peak periods.

REFRIGERATED MIX PANS

Meets NSF Code 7 for dairy and non-dairy based products. Keeps product in mix pans below 40 degrees

INDEPENDENT DRIVE SYSTEM

Allows you to operate each side of the machine independently. Provide flexibility to meet demand during slow and busy periods.

STATE OF THE ART CONTROL SYSTEM

Solid State **AccuFreeze** Control with tamper proof mix out system alerts the operator with an audio/visual alarm when product in the mix reservoir is low and needs to be replenished.

FAST, EASY, CLEAN

SaniServ equipment is design to be easily cleaned and sanitized, with the fewest parts possible for rapid assembly and disassembly.

INVEST IN EQUIPMENT BUILT TO LAST

SaniServ frozen beverage machines achieve long and dependable life through simplicity of design, durable steel frame construction and heavy duty components. Shipped standard with stainless steel exterior.

Floor Model Twin Head Frozen Beverage Freezer

Minimum Wall Clearance
Both Sides and Back -
6 inches (152 mm)

Specifications:

Cooling System:
Air or Water

Dasher and Compressor Motors:

(2) 1/4 HP Dasher
(2) 2 HP Compressor

Refrigerant Type:
R404A

Features:

Evaporator and Mix Reservoir Capacity:
20 Quarts (18.9 liters) per side

Dasher:
Heavy-Duty Stainless Steel with low friction scraper blades.

Controls:
AccuFreeze solid-state control for accurate product consistency.

Solid State Audio/Visual Mix Out System with Compressor Lockout

Warranty:

Parts	1 year
Compressor	5 years
Evaporator	5 years

Options:

- Tune Up Kit
- Parts Tray
- Drink Spinner
- Syrup Rail
- Wash Out Kit - 3/8" Flare Fitting
- Water Cooled - 3/4" Garden Hose Fitting
- Export Voltage

DESIGNED FOR MEDIUM VOLUME APPLICATIONS

4 Mixed Slushes per Minute – 20 Quart Capacity

FOUR DIFFERENT SLUSH FLAVORS AT THE PRESS OF A BUTTON!

The **SaniServ** model 701SAS Floor Model Frozen Beverage Freezer is perfect for providing a choice of any four different slush flavors in one compact machine! By providing slush in different flavors at the touch of a button, customers will always find the flavors that they want and will keep them coming back for more! The 701SAS automatically mixes each slush uniformly each time to insure perfect frozen drinks in the flavor desired! Three blended flavors mean no mixing and measuring. Everyone gets their favorite!

SPACE SAVING

Compact Design - **SaniServ** model 701SAS provides four flavors in one machine in a compact countertop design. Operators will enjoy the ease of operation and utilize the 701's ability to turn counter space into a high profit center by providing four flavors of frozen beverage and providing a flavor that every customer enjoys!

EASY CLEANING AND OPERATION

HIGH FROZEN PRODUCT VISIBILITY MEANS HIGH PROFITS!

The **SaniServ** model 108R Frozen Beverage Freezer provides owners and operators everything they are asking for: *Frozen beverage visibility merchandising* in a consistent and reliable machine with *remote refrigeration* and *remote auto fill!* The unit's extra large 8" faceplate design allows customers to view colorful frozen beverages being offered without the condensation and unreliable operation of traditional "bubble top" machines! The high frozen product visibility, along with increased production and reliability, results in increased sales and high profits! The 108R's remote refrigeration system is ideal for lowering costly indoor air conditioning operating costs by providing less heat build up while providing quieter operation!

SPACE SAVING

Small Footprint Design - SaniServ model 108R offers frozen product visibility in reliable space saving equipment and design! Owners and Operators can turn the countertop into a highly colorful profit center by providing the frozen beverages customers enjoy!

EASY CLEANING AND OPERATION

Fewer Parts = Simplified Cleaning – SaniServ equipment is designed and built with the fewer parts to be disassembled, cleaned and sanitized than any other machine in the industry.

HIGH RETURN ON INVESTMENT

Increased Profits – SaniServ machines combine affordable efficiency with consistent product quality and fast quiet operation to insure customer satisfaction with high profit frozen beverages.

OFFER TWO DIFFERENT FLAVORS IN ONE MACHINE!

The **SaniServ** model 798R Countertop Frozen Beverage Freezer can provide two frozen beverage favorites in one machine! With an independent drive system in each side of the machine, product can be easily maintained and or changed in either side when desired! The 798R's mix pan is also refrigerated to ensure quicker recovery time. By offering not one, but two frozen products, owners and operators will insure every customer stays satisfied and increase their operating profits! The 798R's remote refrigeration system is ideal for lowering costly indoor air conditioning operating costs by providing less heat build up while providing quieter operation!

SPACE SAVING

Small Footprint Design - SaniServ model 798 provides two frozen beverage flavors in a countertop model design. Operators will enjoy the ease of operation and the versatility to offer two different types of frozen beverages that customers desire at the same time!

EASY CLEANING AND OPERATION

Fewer Parts = Simplified Cleaning – SaniServ equipment is designed and built with the fewer parts to be disassembled, cleaned and sanitized than any other machine in the industry. DESIGNED FOR LOW VOLUME APPLICATIONS

Two Quart Capacity

ECONOMICAL IN PRICE & SPACE!

The **SaniServ DuraFreeze** DF300 two-quart batch freezer is ideal for providing small servings, samplers, and adding a-la-mode to favorite desserts. Producing a single yield of high profit, consistent quality product was never easier! Rapid disassembly and assembly makes this Batch Freezer easy to use and operate. Economical in price and space, *DuraFreeze* offers the prospect for high profits and customer satisfaction.

SPACE SAVING

Small Footprint Design - SaniServ DuraFreeze 300 saves valuable floor space and turns the countertop into a real profit center by serving high profit ice cream gelato, sorbet and sherbet products.

EASY CLEANING AND OPERATION

Fewer Parts = Simplified Cleaning – SaniServ equipment is designed and built with the fewer parts to be disassembled, cleaned and sanitized than any other machine in the industry.

HIGH RETURN ON INVESTMENT

Increased Profits – SaniServ machines combine affordable efficiency with consistent product quality and fast quiet operation to insure customer satisfaction with high profit frozen beverages.

QUALITY DESIGN

Durability – SaniServ machines are built to achieve long and dependable life through simplicity of design. Every machine is shipped standard with a stainless steel exterior, durable construction, heavy duty components and consistency systems.

Designed For High Volume Applications Great for use with any Frozen Beverage Machine

The **SaniServ** SAFS 12 or SAFS 24 is a Complete Integrated Auto Fill System for use with Pre-Mixed products, in any Frozen beverage application.

EASY PRODUCT HANDLING

One or Two Vat Systems - save valuable floor space with the compact design SaniServ's exclusive Mix Vat cart allows for transportation either one or two 12-gallon mix vats to be transported. The heavy duty cart comes with heavy duty casters, two which are locking, push handle, and mix vat locking plate. Auto Fill system and the box rack mounted inside an enclosed cart, which comes with 4 heavy-duty casters, 2 which are locking.

AUTO FILL PUMP SYSTEM

Complete Electric Pump System – with recirculating timer are installed on a stainless steel platform, which sits on the lid of the mix vat. Simply plug into a 115 V. outlet and it's ready to go. The S.S. Pump Platform fits in to a slot on the handle for easy storage when filling, cleaning or transporting mix vats.

EASY OPERATION

Recirculating Timer – Set timer to turn pump every hour for up to two 15-minute intervals to insure product is completely mixed.

Easy Cleaning and Filling – Simply roll the Mix Vat Cart to the sink area to wash, sanitize and refill vats. No heavy lifting of mix containers to refill machine.

MAXIMIZE YOUR PROFITS

Consistent Product Quality – Combine efficiency, product quality, cost control, ease in use and simplicity of operation. Always have product available during peak hours of operation.

COMPACT DESIGN

The small footprint easily fits into any operation using a minimum of cooler space.

Bucket Hanger Kit

The heavy duty **SaniServ** Bucket hanger is designed to eliminate the need for an employee to stand and hold a 25 to 30 pound bucket under the spigot while draining product, cleaning solutions or sanitizer during the cleaning process. Typically, rather than holding the bucket, the employee will rest it on the drip tray where the bucket can slip and spill. If the bucket has a bail they will hang it on the spigot plunger or handle. Hanging the bucket on the spigot eventually leads to the face plate cracking. It is not a case of *if* it will crack, but *when* it will crack. We have received many complaints from end users about cracking face plates. When we receive the face plate for inspection, 99% of the cracks are stress cracks caused by buckets hanging from the spigot. This is a very expensive part to replace.

The new Bucket Hanger fits on the top of the machine with one end extending into the mix pan and then hangs over the front of the machine. The hook on the front of the bucket hanger holds the bail of the bucket allowing the bucket to swing under the spigot opening. This makes the process nearly hands free.

The Bucket Hanger is made of 11 gage Stainless Steel and will support up to 20 quarts of liquid. The bucket hangers are machine specific, therefore, you will need to specify the model number when ordering the bucket hanger. Bucket Hangers are sold separately and in a kit which includes a specially designed heavy duty **SaniServ** bucket.

Buy Cleaning Buckets and rerun containers to increase your productivity with your **SaniServ** Products!

Insulated Lid For Ice Cream and Shake Machines

The new **SaniServ Insulated** lid for ice cream and shake machines, has been designed to improve the overall performance for any **SaniServ** machine. The new insulated lid is a must for the safety conscious restaurateur offering the following advantages:

- Reduced the overall temperature range of the mix being held in the mix reservoir by up to 4 degrees. This is essential to the successful placement of a Burger King unit.
- Prolongs the shelf life of the mix due to lower reservoir temperature.
- Reduces bacteria counts in the mix in the reservoir. Mix can be held longer with less waste.
- Improves production and recovery time of the machine due to the lower temperature of the mix.
- Improved service life of the lid because of the stronger construction and double wall thickness at edges.
- Save energy due to shorter recovery cycle time.
- Fits all 15 Quart mix reservoirs.

Buy the new insulated lid for your existing SaniServ machine to improve energy efficiency and performance!

Insulated Lid Ice Cream and Shake Machines

Storage Containers

SaniServ storage containers are available in N.S.F. and U.S.D.A approved food grade translucent plastic material complete with graduations. They are also available in natural white plastic material. These containers are ideal for your customers to store liquids, food products, dry ingredients or any number of other uses.

Designed for use at temperatures between 10 and 180 degrees the translucent containers with graduations are ideal for mixing and storing, soft serve, shake and frozen beverage mixes requiring refrigeration. The graduations make it easy to measure ingredients or to quickly see the type and quantity of product in the container.

Our molded in reverse curved handles make lifting even heavy load comfortable. The containers come in a variety of sizes from two quarts to forty quarts in capacity. The twenty-four quart is ideal for mixing five-gallon batches.

The natural white storage containers are more flexible, making them very durable and more resistant to temperature fluctuations. These containers are designed for use from -40 to 140 degrees fahrenheit. They are available in the same sizes as the translucent containers.

Lids are available in natural white, red, green, blue and yellow in all sizes.

Also available is a 15 Quart utility pail ideal for cleaning and sanitizing machines. They are available in gray, white, and red. They are also graduated on the inside for easy filling.

The 12 gallon plastic container and lid that is used with the auto fill system is available in natural white. Special colors may be ordered with quantities and lead times.

Totes and food storage boxes are available in 5" and 7" depths. These boxes are heavy duty and are available in translucent, natural white, black, gray, brown, red, green and yellow. Lids are also available.

Buy a package of products that make it easy to use your **SaniServ** Machine!

Storage Containers

We reserve the right to change specifications and products design without notice. Such revisions do not entitle the buyer to corresponding changes, improvements, additions or replacements for previously purchased equipment

Cord Sets

SaniServ is pleased to announce the availability of the cord, plug and receptacle options for all 230 volt machines. The cord and plug will be assembled but not attached to the machine and shipped with receptacle. This is part of our “Plug and Play” concept. Making ownership of **SaniServ** equipment as friendly as possible is top priority.

We have received many inquiries as to why we don't provide the cord and plug on all of our machines. The problem lies with UL, which doesn't allow for the cord and plug to be attached to the machine.

Many customers don't realize that the machine will not have a cord and plug, then have to pay the electrician to go and source a cord and plug. This is an extra expense for them. By the same token, if we ship just the cord and plug, it is unlikely that the customer has the proper receptacle and the same process occurs.

Increase your customer's satisfaction, simplify the “Plug and Play” installation process by specifying and adding the cord, plug and receptacle option to all of your quotes.

Use this value added option to increase your sales!

The *AccuFreeze* Advantage

1. **AccuFreeze** controls have no moving parts to wear out, break or maintain. This state-of-the-art electronic design is preset at the factory for optimum product control.
2. **AccuFreeze** utilizes viscosity not temperature to control the quality of the product being served. This process creates the smoothest most consistent frozen treats available today.
3. **AccuFreeze** provides personalized product preference settings by incorporating one simple adjustment for consistency control. No more grooved pulleys, springs or idlers that squeak and need adjusting. This provides trouble free operation for the machine owner.
4. **AccuFreeze** uses a specially designed “V” belt that wears in not out. This feature provides the quietest operating machine available in the industry.
5. **AccuFreeze** controllers incorporate a self diagnostic feature that provides the servicer with vital information in the unlikely event of a service call. This shortens trouble shooting time for the servicer lowering service costs for the owner.
6. **AccuFreeze** incorporates a three minute lockout timer to prevent machine damage due to operator error. **AccuFreeze** protects the owner’s investment by preventing freeze ups due to low mix in the reservoir.
7. **AccuFreeze** controls provide for worry free operation that provides the best quality product in the industry. It is so easy that any one can do it. We like to call our new **AccuFreeze** controlled units plug and play. Just plug them in and they do the rest.
